2010 T-10 NAC Sail Measurement:

April 29, 2010

Hello.

This is the first reminder that the T-10 Sail Tag policy has been fully (or at least mostly) implemented. It is expected that all sails at the 2010 T-10 NAC newer than 2008 arrive to the Regatta with a Sail Tag.

It is our intention to simply log-in the serial #'s on sails with sail tags of the sails you'll be using at the NAC Regatta. As has been the procedure for the last few years, we'll also be logging in older sails that "have been previously measured at an NAC".

Obviously, there will be some "old" sails that have not been measured/ tagged, which we will have to measure accordingly. But again, all new sails are expected to be tagged. Your local sailmaker should have, or be able to get tags. If you are unable to get tags from your sailmaker, please contact myself or your local measurer.

Thanks.
